

Dear Madam or Sir,

starting June 1st, 2007 the new Regulation (EC) No. 1907/2006 (REACH-Regulation) became effective.

As a producer of refractory materials and casting auxiliaries – INTOCAST AG is according to the REACH Regulation a downstream user. Therefore our suppliers in the EU have the registration obligation for substances mentioned by REACH.

Both, the first registration deadline of the REACH Regulation and the first step of the implementation the European Union Regulation 1272/2008 “Classification, Labeling and Packing of chemicals”, took place at December 1st, 2010.

Please note, that the required information (Material Safety Data Sheets, registration number) cannot be available at the same time as the registration deadline indicated by REACH.

After receiving all necessary information of our suppliers we will update and provide our MSDS accordingly.

Please consider, that in accordance with Article 31 and in connection with Annex II of the REACH Regulation, the dangerous ingredients in a mixture are only listed in MSDS above defined concentration limits. In this case the reach registration numbers must be indicated.

If you have any further questions, please do not hesitate to contact us: reach@intocast.de
